GST Invests in Kanawha Valley Location, Unveils Local Team Committed to Working with State Government and Commercial Business

Charleston, WV – Global Science & Technology – West Virginia announces the opening of a new office in the Kanawha Valley focused on providing additional services to its state and commercial customers.

“We’re building a team committed to delivering leading edge IT solutions to the Kanawha Valley that our customers throughout the country have grown to expect,” explained Director of State & Commercial Projects, Cannon Wadsworth.

The new staffers, who are no strangers to working on projects for both government and private business, have lived in the Charleston area for many years. They are: Daniel Carter, a 12-year technology veteran who helps GST support a variety of projects for the state of West Virginia; Jeff Sines, a Gulf War Veteran who’s background includes working primarily on computer and document imaging systems; and Marc Beacom, who’s been working in the state government and commercial markets as a consultant and IT sales professional for 20 years. Beacom is currently serving as an Account Manager and Recruiter serving clients with three specific areas of expertise, which are: Document Imaging and Data Management solutions, Outsourced Application Development Project services, and Recruiting and Staffing of Information Technology Professionals.

“We see a lot of potential in the Kanawha Valley market,” explained Wadsworth. “GST already has a strong track record of providing cost-effective and efficient technology solutions to the state and we believe our new office and capable staff will be keys to expanding our success story.”

GST’s Kanawha Valley office is located at 3751 Teays Valley Road in Hurricane. The office phone number is: (304) 760-2100.

About Global Science & Technology

Global Science & Technology, Inc. was founded in 1991. With offices in Maryland, Washington, D.C., West Virginia, Colorado, and North Carolina, GST has built a highly specialized workforce that includes experts in key domains of engineering, science, communications, and information technology. GST provides all levels of scientific and technical expertise and support within the federal R&D laboratory environment. GST's major clients include NASA Goddard Space Flight Center (GSFC), NASA Headquarters (HQ), the National Oceanic and Atmospheric Administration (NOAA), the Department of Defense, the State of West Virginia, and the US Air Force. Much of GST's work has been in direct support of NASA and NOAA science missions and related data systems. GST's signature emphasis is on systems interoperability and solutions based on open standards.
