

For Immediate Release

**Global Science & Technology (GST) Member of Winning Team for NASA Evaluation and Support Contract**

**Greenbelt, MD, May 9, 2005** – Global Science & Technology, Inc. (GST) is a member of the Science Applications International Corporation (SAIC) team selected by the National Aeronautics and Space Administration (NASA) to receive the Earth and Space Science Evaluations, Assessments, Studies, Services and Support (ESSSO) contract. The five-year, \$110-million, indefinite-delivery/indefinite-quantity (IDIQ) contract supports the NASA Langley Research Center Science Support Office (SSO), Hampton, VA, and the Science Mission Directorate, NASA Headquarters, Washington, DC.

The SSO contract will require management, scientific, and technical studies, as well as assessments used in evaluating current and potential NASA programs. SAIC will provide information management services including Web-based systems, databases, reference documents, and Web site development.

GST President Chieh-san Cheng said, “For well over a decade, GST has supported NASA in the fields of meteorology and other science, engineering, and IT services. We look forward to working with SAIC again to support this important work of the NASA Science Support Office.”

GST is a \$40-million small, disadvantaged business (SDB), and one of five subcontractors supporting SAIC in the ESSSO contract. GST has supported NASA Goddard Space Flight Center, Greenbelt, MD, since GST's inception in 1991. The company was formed to provide Earth and space science, engineering, and information technology (IT) services to the Federal Government, industry, and academic clients. GST offers an experienced, highly qualified team of professionals with a broad range of domain and discipline expertise performing full life-cycle development, engineering services and technical support. From 2000-2005, GST served as prime contractor (with SAIC its principal subcontractor) for the NASA Peer Review Services (NPRS) contract. GST is the recent award winner of the [NASA Earth Science Data Management and Archiving \(ESDMA\) contract](#). The company received the 2003 Gold 2004 Space Flight Center Contract Excellence Award for NPRS Business Services, and was listed in *Inc Magazine's* 500 Research and Education Companies in 2002 (ESSSO), Deloitte and Touche's Fast 500 for 2002 and 2003, and Maryland Fast 50 for the last five years.
