**** FOR IMMEDIATE RELEASE ****

GST To Demonstrate Successful ADIS Project at WV Tech Conference

Fairmont, WV – Global Science & Technology, Inc. (GST), West Virginia’s technology solution, will be showcasing its successful and innovative Audit Detail Imaging System (ADIS) at the annual West Virginia Statewide Technology Conference. GST’s ADIS allows state agencies and universities to scan their invoices and send them directly to the state’s auditor’s office, eliminating multiple copies and time delays.

The annual conference will be held on August 13-17, 2007 at the Charleston Civic Center in Charleston, West Virginia. The theme for this year's conference is "**A Technological Convergence**".

GST’s Director of State and Commercial Projects Cannon Wadsworth will be giving the presentation which is scheduled for Thursday, August 16 beginning at 10:10 a.m.

“We’re honored to have the opportunity to present our ADIS system to those attending the states only technology conference,” said Wadsworth. “The goal of the event has always been to promote the latest technology advances. ADIS certainly is a technology that has a proven record of saving the state time and money.”

ADIS evolved from a partnership with Fairmont State University. GST developed a reliable and secure solution for scanning and submitting invoices and backup documentation to WV State Auditor Glen Gainer’s office as a foundation to the State invoice payment process. GST’s ADIS is currently being used by the Department of Transportation, Fairmont State, Marshall, WV School of Osteopathic Medicine, and Concord and is being evaluated by the Auditor’s Office and the Office of Technology/Department of Administration. Agencies with the foresight to avoid a labor intensive and ineffective manual process are choosing ADIS to satisfy the Auditor’s goal of all agencies participating in a paperless payment process.

About Global Science & Technology, Inc.

Global Science & Technology, Inc. (GST) was founded in 1991. With offices in Maryland, Washington, D.C., Virginia, West Virginia, Colorado, and North Carolina, GST has built a highly specialized workforce that includes experts in key domains of engineering, science, communications, and information technology. GST provides all levels of scientific and technical expertise and support within the federal R&D laboratory environment. GST's major clients include NASA Goddard Space Flight Center (GSFC), NASA Headquarters (HQ), the National Oceanic and Atmospheric Administration (NOAA), the Department of Defense, the State of West Virginia, and the US Air Force. Much of GST's work has been in direct support of NASA and NOAA science missions and related data systems. GST's signature emphasis is on systems interoperability and solutions based on open standards.

About The 2007 West Virginia Statewide Technology Conference

This annual conference will be held on August 13-17, 2007 at the Charleston Civic Center in Charleston, West Virginia. The theme for this year's conference is "**A Technological Convergence**". Our goal is to provide sessions, exhibits and events of interest to a wide range of constituents including K-12 education, higher education, and state agencies. The conference sessions are divided into the following categories to appeal to the various interests of the participants:

- Statewide Technology Partnerships and Resources
- Teaching and Learning with Technology
- Security and Network Management
- eCommerce
- Banner
