Global Science & Technology Names New NOAA and NASA Capture Director

Greenbelt, MD – Global Science & Technology, Inc. proudly announces that Michael S. Walker has accepted the position of Director of New Business Development responsible for capturing National Aeronautics and Space Administration (NASA) and National Oceanic and Atmospheric Administration (NOAA) related business for the company.

“We are very fortunate to have a person with Michael’s credentials join the GST family,” said GST President Chieh-san Cheng. “He has an impressive track record of creating and implementing successful business development strategies and managing winning proposals across a broad range of industries and technologies, from aerospace and defense to healthcare and social sciences.”

Walker, who is no stranger to working in the international scientific and technology contracting community, is honored to join GST, noting the successful science and technology firm is a perfect fit.

“I’m excited about this outstanding opportunity,” Walker explained. “Global Science & Technology is a world-class company that is well known in the government contracting community and around the nation.”

Walker is an accredited member of the Association of Proposal Management Professionals (APMP) and a Fellow of the UK’s Chartered Management Institute. He has held senior executive positions at a number of highly regarded government contracting firms, including ARINC Incorporated and Serco Group, Inc., where he was Executive Vice President of Business Development for the company’s North American business unit. As a business development consultant working independently and through companies such as Shipley Associates, Walker has been Capture Manager and/or Proposal Manager on critical ‘must-win’ proposals for a broad range of technical and support services companies for contracts with many different government agencies both in the U.S. and abroad.

About Global Science & Technology, Inc.

Global Science & Technology, Inc. was founded in 1991. Currently, Global Science & Technology has offices in six locations: Greenbelt, Maryland; Washington, DC; Fairmont, West Virginia; Boulder, Colorado; Asheville, North Carolina; and Huntsville, Alabama. Global Science & Technology has built a highly specialized workforce that includes experts in key domains of engineering, science, communications, and information technology. Global Science & Technology provides all levels of scientific and technical expertise and support within the federal Research and Development (R&D) laboratory environment. Global Science & Technology's major clients include NASA Goddard Space Flight Center (GSFC), NASA Headquarters, NOAA, Department of Defense (DoD), Department of Justice (DOJ), and the State of West Virginia. Much of Global Science & Technology's work has been in direct support of NASA and NOAA science missions and related data systems. Global Science & Technology's signature emphasis is on systems interoperability and solutions based on open standards to create efficiencies and reduce overall cost of operations.
